Arches are measured by adding the height plus the width and multiplying by 1.5

For example, a 30' arch is 12 feet wide (from outside base to outside base) and 8 feet high (to the top of the highest balloon) multiplied by 1.5

Arches can be added to in increments of 7.5 linear feet, adding about 5 ft to the width of the arch, or 3ft to the width and 2ft to the height.

Arches require a \$100 deposit for the pole and base system and returnable to the store 24hrs after the arch is completed
